

Muskegon July 24

Had a crew of 4 aboard on Tuesday for some salmon action. We tried in the muddy water for starters and at the end of the first pass we pulled two nice kings in clear water south of port a bit. The first came on a spinnie fly off the diver and the second came off a tomic on the 5 color. That warranted another pass and we pulled a little guy on the north end of the pass on a green glow J off the rigger. After fighting with some traffic and making another pass unsuccessfully, we headed to deeper water. The temperature break in the 120 range was still there although not as pronounced as the weekend. We found fish on the warm side again and picked our way through some fish to get 9 in the box and had a couple more bites. We finished out with one nice steelie and one good laker and the rest kings. Mashed banana Northport Nailer was the ticket in the deeper water taking 5 bites from the 5 to 8 color leadcore. Drumfish took one on the 11 color and Orange Ice took one on the 3 color. 10" blue crush flasher with Seamist horse fly took the laker down 100' and big blue and chrome took on 225 back on the inside diver.

More trips scheduled for this weekend
