

8/22-8/23

Fishing was real good on Friday with lots of action.Â We boated 13 and had about 26 bites.Â Lots of bites with no one home.Â We lost a few at the back of the boat also. The bite was all HorseFlies.Â Atomic green glow, blue moon glow and SeaMist were all on fire.Â Big white flashers and 8" E chips were the ticket on riggers and divers.Â Only one plug bite all day.Â They wanted Flies!!!!Â In the morning, fish were in the 90-110 range and as the sun poked a bit higher we found them in the 130-160 range.Â We finished with 11 kings and 2 lakera.

Â

Saturday was more of the same, except fish were taking it for keeps.Â Fish were large but so were the waves.Â After a half hour delay due to weather, we fished the 100' range.Â We found some fish again in the 100-110 water and drifted out as the sun came up.Â However, the fished stayed put.Â After making a loop to get back inside, we found two more good kings and then called it due to waves.Â We finished 5 for 6 with kings up to 17.75#.Â it was all green on Saturday for me, with Seaweed going twice and Atomic Green glow going once.Â Green glow plug went three times on the 300 copper.Â

The fish are there.Â Get out there while its HOT!

Â
