

Fishing report 8/27

Fishing around muskegon has had mixed results, but one common theme has been big fish! The offshore fishery has been spotty. Some great catches and some not so great catches. The inshore fishery for the mature kings has been good and should get better. After the water flipped a couple weeks ago, there have been kings in and around the piers since. Lots of 20#+ fish being taken. This past weekend we fished in front of the piers and inside the piers and did well. Sunday we fished in Muskegon lake and did well. The next couple weeks should see a large push of mature fish coming into the piers and make for some exciting up close and personal big fish action.
